**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 14-24, drawn to a polymerization process, classified in class 526, subclass 170.
  - II. Claims 25-31, drawn to a syndiotactic/atactic block polypropylene, classified in class 526, subclass 351.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the syndiotactic/atactic block polypropylene can be prepared by a materially different process wherein a different metallocene catalyst is used.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 1713

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
6. During a telephone conversation with attorney William Jackson on December 15, 2004 a provisional election was made with traverse to prosecute the invention of Group I, claims 14-24. Affirmation of this election must be made by applicant in replying to this Office action. Claims 25-31 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.
7. The search results indicate that the elected Group I is novel.

#### **EXAMINER'S AMENDMENT**

8. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with attorney William Jackson on December 21, 2004.

The application has been amended as follows:

#### Specification

In the first paragraph of the specification which is added to the specification through Preliminary Amendment filed on June 26, 2003, after the phrase "September 11, 2000," insert --now US Pat. No. 6,630,550,--.

Art Unit: 1713

Claims

- (i) Cancel nonelected claims 25-31.
- (ii) In claim 14, line 7, replace ":" with --;--.
- (iii) In claim 24, line 3, delete the first "," which followed the word "block".

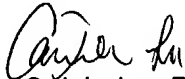

9. The following is an examiner's statement of reasons for allowance: The instant application is a divisional application of application SN 09/658,069, now US Pat. No. 6,630,550 B1. The claims of the parent application are directed to a catalyst composition. The instant claims are directed to an olefin polymerization process in the presence of the same catalysts as those of the parent application, thus, the instant claims share the same catalyst novelty as the claims of the parent application and are also deemed to be novel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
